

## **What Should I Know About Cart Paths**

**Did you know that a typical golf cart loaded with two golfers weighs about 1000 pounds.**

**Did you know that our cart paths are wide enough to hold 2 carts side by side.**

**Did you know that nothing causes more damage to golf courses than the improper use of golf carts.**

**Did you know that some golfers have a chronic affliction called Two Wheels Off Path or commonly known as TWOP.**

**Below is a picture of TWOP in its most destructive form.**

**Did you know that some golfers have an acute affliction called All Wheels Off Path or commonly known as AWOP. In its most insidious form this golfer will drive near the greens thus compacting and killing the grass. This makes it difficult for other golfers to execute pitch shots from the hard compacted grassless areas around the greens.**

**Below are some pictures of the damage done by the AWOPs.**

**Can you guess some of the green areas they are destroying.**

**Actions of the TWOPs and AWOPs are destructive to the golf course. Please help rehab those who have these afflictions.**
