

High pressure sodium:	Lumens	Monthly rental, plus tax.
100 W.	9,500	\$9.58
150 W.	15,000	8.21
200 W.	22,000	11.55
250 W.	22,500	13.71
400 W.	50,000	21.91

LED	Monthly rental, plus tax.
XNV	\$8.17
XNV2	\$13.65

- (9) Temporary or seasonal service surcharge: When commercial or industrial service is provided for a period of less than one (1) year continuously or is seasonal or temporary, a surcharge of twenty-five (25) per cent shall be added to each month's bill, before applying tax, after the bill has been computed in accordance with the applicable rate schedule. No monthly minimum or other charge is to be made during the period that service is disconnected. For each nonrecurring temporary service where it is necessary for a temporary service pole to be set and/or a temporary service drop to be installed from existing utility facilities, the city may assess additional charges to recover the cost of installing and removing such service.
- (10) Tax: The four (4) per cent Alabama Utilities Gross Receipts Tax is applicable to all rates, except exempt accounts of city, state and federal governments. Should any other state or federal tax be levied, it shall be charged in addition.
- (b) Schedule FCA. Schedule FCA shall provide for the monthly fluctuation in wholesale "fuel adjustment cost" changes as currently reflected in the monthly purchased power invoice received from the Alabama Municipal Electric Authority ("AMEA"). In the event schedule FCA results in a negative factor, such negative FCA factor shall be applied to each customer's monthly bill. All FCA factors shall be rounded off to the nearest one-thousandth of a mill (\$0.000000).

The FCA shall be calculated from the total current billing period's wholesale fuel adjustment charges billed from supplier(s) and then billed at retail by the city, as follows:

$$FCA = (F+A)/R$$

Where:

F = Total estimated wholesale supplier fuel adjustment charges to be billed during the coming billing period(s) in dollars.

A = Adjustment to reflect any over/under recovery of the FCA during previous billing period(s) in dollars.

R = Total retail kWh sales estimated to be billed during the coming billing period(s).

- (c) Labor Cost Adjustment (LCA). The base rates set forth above may be adjusted periodically to
