Subject: Church Street project update, 4.27.22

Importance: High

Good morning,

The Church Street infrastructure project continues to move forward as we work to replace aging water, wastewater, and stormwater infrastructure on this major street in downtown Fairhope. As a reminder this project started at Church/Oak last spring and will continue to move to Fels Avenue. Expected completion date is Fall.

See below for important updates for the coming weeks:

Beginning May 2nd:

- Fairhope/Church intersection will be reopened by the end of the day or earlier.
- There may be intermittent sidewalk closures on the west sidewalk of Church Street between Fairhope and De La Mare. As we receive anticipated dates for these closures, we will be in touch with individual business owners if you will be affected.

Beginning May 9th:

- De La Mare will be closed from Section to Church. Sidewalks will remain open.
- Parking will be intermittently closed on the east side of Church from De La Mare to Morphy.
- Parking will be closed on the west side of Church from De La Mare to St. James. If you see No Parking signs, please do not park in the parking spot.

Beginning May 12th:

- De La Mare will be reopened from Section to the alleyway that leads to Fairhoper's Community Park; traffic will be allowed to enter the alleyway from De La Mare during this time.
- De La Mare will remain closed from the alleyway that leads to Fairhoper's Community Park to Church Street. This portion of the roadway will reopen on May 23rd.
- Sidewalks on De La Mare will remain open.

Please don't hesitate to call, text, or email me if you have any questions.

Thank you,

Jessica
